Performance & Appraisal Measurement

Allow areas across a country or the world to have access to the same information, the ability to edit and control data whilst ensuring no effect in performance of the system

Control and manage documents within BMS. Assign access levels to individual documents, view change and version control information along with change history

Manage business projects through the Project Reporting system whilst comparing performance against milestones and integrating with Scorecards. This module also integrates with other software packages such as SAP.

Record individual & business appraisals carried out through the Performance Measurement environment to provide specific access to the results and a history of measurements company wide and individually

Store historical documents such as financial information within the BIL for future reference. Also eliminate the need for filing cabinets with this e-library concept.
